RESEARCH STUDY

Omnidirectional Mobility Platform for Wheelchair Users

Join our study: Make a difference! Help us test a new omnidirectional wheelchair designed to improve mobility and everyday task performance.

PARTICIPANTS WILL:

- Attend one in-person visit at Human Engineering Research Laboratories for approximately 3 hours.
- Complete questions about mobility device use and demographics.
- Practice using, driving and completing several tasks with Omnichair and your mobility assistive technology.
- Complete a short interview at the end of the study.

ELIGIBLE PARTICIPANTS:

- Are Veterans age 18-65 years old.
- Use a mobility assistive technology (e.g. cane, walker, scooter, manual or power wheelchair) for four or more hours daily.
- Weigh less than or equal to 250 lbs (113.4 kg).
- Can shift weight independently.
- Do not have pressure sores; back, pelvic or thigh pain; or self-reported pregnancy.
- May be compensated up to $100
